# CONTENTS, VOLUME 96

**NUMBER 1** — **JANUARY 1968**

Numerical Advection Experiments — W. P. Crowley — 1–11
A Statistical Study of the Vertical Structure of Traveling Planetary-Scale Waves — Raymond J. Deland and Keith W. Johnson — 12–22
On the Maintenance of the Mean Zonal Motion in the Indian Summer Monsoon — R. N. Keshava Murty — 23–31
An Interpretation of Barotropic Instability in Terms of the Frequency of Momentum Convergence — Philip E. Merilees — 32–38
Effect of Significant Climatic Factors on Agricultural Production and Incomes—A New Zealand Example — W. J. Maunder — 39–46
Stability Inferences From Precision Rawins — Harold W. Baynton — 47–53
Picture of the Month — Frances C. Parmenter — 54–55
The Weather and Circulation of October 1967—Continued Cool East of the Rockies and Warm in the Far West — James F. Andrews — 56–62
Correction Notice — 62–72b

**NUMBER 2** — **FEBRUARY 1968**

A Comparison of the Climate of the Eastern United States During the 1830's With the Current Normals — E. W. Wahl — 73–82
Integration of a Spectral Barotropic Model From Global 500-Mb. Charts — André J. Robert — 83–85
Effects of Variable Stability in a 1000-Mb. Graphical Prediction Model — Dale A. Lowry and Edwin F. Danielsen — 86–97
Suggestions for Authors — 98
Correspondence
Comments on "The Over-Relaxation Factor in the Numerical Solution of the Omega Equation" — James J. O'Brien — 99–104
Reply — David W. Stuart — 104
Selected Publications by ESSA Authors — 105
Typhoon Formation Within the Zone of the Intertropical Convergence — Robert W. Fett — 106–117
Storm Surge Over the Mississippi River Delta Accompanying Hurricane Betsy, 1965 — D. A. Goudeau and W. C. Conner — 118–124
Correction Notice — 124
Picture of the Month—An Example of the "Fujiwhara Effect" in the West Pacific Ocean — Gilbert Jager — 125–126
The Weather and Circulation of November 1967—Strong Middle-Latitude Ridges, Continued Warm in the Far West and Cool in the East — Raymond A. Green — 127–132

**NUMBER 3** — **MARCH 1968**

Oscillations in Atmospheres With Tops — R. S. Lindzen, E. S. Batten, J.-W. Kim — 133–140
Fields by Correlation Assembly—A Numerical Analysis Technique — Maurice B. Danard, Manfred M. Holl, and James R. Clark — 141–149
An Energy-Conserving Difference Scheme for the Storm Surge Equations — Anita Sielecki — 150–156
Note on the Formulation of Finite Difference Equations Incorporating a Map Scale Factor — Frederick G. Shuman and John D. Stackpole — 157–161
Relation Between Upper Air Lows and Winter Precipitation in the Western Plateau States — William H. Klein, Donald L. Jorgensen, and August F. Korte — 162–168
Note on an Apparent Trend in Annual Precipitation at New York City — Jerome Spar and Peter Ronberg — 169–171
Intertropical Convergence Zone and Mean Cloud Amount in the Tropical Pacific Ocean — Frederic A. Godshall — 172–175
Suggestions for Authors — 176
Inversions Over the Tropical Eastern Pacific Ocean — Paul Y. Haraguchi — 177–185
Correspondence
Comments on "Tornado Damage Patterns in Topeka, Kansas, June 8, 1966" — Lawrence A. Hughes — 186–187
Reply — Joe R. Eagleman — 187
Picture of the Month — Frances C. Parmenter — 188–189
The Weather and Circulation of December 1967—Temperature Reversal Associated With Intramonthly Amplification — L. P. Stark — 190–195

**NUMBER 4** — **APRIL 1968**

A Diagnostic Balance Model for Studies of Weather Systems of Low and High Latitudes, Rossby Number Less Than 1 — T. N. Krishnamurti — 197–207
A Study of a Developing Wave Cyclone — T. N. Krishnamurti — 208–217
Application of a Diagnostic Numerical Model to the Tropical Atmosphere — David P. Baumhefner — 218–228
Variational Resolution of Wind Components — J. J. Stephens — 229–231
Distribution of Global Radiation in Wisconsin—December 1966 Through June 1967 — James P. Kerr and Hans E. Rosendal — 232–236
Mesoscale Sampling of Global Radiation Analysis of Data From Wisconsin — J. P. Kerr, G. W. Thurtell, and C. B. Tanner — 237–241
The Hurricane Season of 1967 — Arnold L. Sugg and Joseph M. Pelissier — 242–250
Atlantic Tropical Disturbances, 1967 — R. H. Simpson, Neil Frank, David Shideler, and H. M. Johnson — 251–259
Picture of the Month—View of Snow-Covered Northeastern United States and a Developing East Coast Storm — Ralph K. Anderson — 260–261
The Weather and Circulation of January 1968—Extreme Cold Followed by Rapid Warming at Mid-Month — A. James Wagner — 262–267

**NUMBER 5** — **MAY 1968**

A Numerical Study of the Diurnal Variation of Meteorological Parameters in the Planetary Boundary Layer: I. Diurnal Variation of Winds — K. Krishna — 269–276
Comparative Test of Wind Laws for Numerical Weather Prediction — H. W. Ellsaesser — 277–285
Vertical Motion at 100 Mb. in the Tropics — M. A. Lateef — 286–290
Generation of Available Potential Energy in Hurricane Hilda (1964) — Richard A. Anthes and Donald R. Johnson — 291–302

**NUMBER 5 (Continued)** **MAY 1968**

Suggestions for Authors ... 303
Mesoscale Motions in Oceanic Stratus as Revealed by Satellite Data ... Walter A. Lyons and Tetsuya Fujita 304–314
Statistical Test of Rules for Determining Points on Surface Ridgelines From Weather Satellite Photographs ... Arthur H. Smith 315–318
A Proposed Method for Ship Routing Using Long Range Weather Forecasts ... G. J. Haltiner, W. E. Bleick, and F. D. Faulkner 319–322
Correspondence
Comments on "The Over-Relaxation Factor in the Numerical Solution of the Omega Equation" ... Yonejiro Yamagishi 323–324
Reply ... David W. Stuart 324
Bias Introduced by Anemometer Starting Speeds in Climatological Wind Rose Summaries ... Lawrence E. Truppi 325–327
Picture of the Month ... Frances C. Parmenter 328–329
The Weather and Circulation of Febuary 1968—Cold and Dry in the East, Warm in the West ... Julian W. Posey 330–336

**NUMBER 6** **JUNE 1968**

On the Momentum Exchange Between the Atmosphere and Earth Over the Northern Hemisphere ... Ernest C. Kung 337–341
Objective Analysis of Environmental Conditions Associated With Severe Thunderstorms and Tornadoes
R. M. Endlich and R. L. Mancuso 342–350
Integration of the Nondivergent Barotropic Vorticity Equation With an Icosahedral-Hexagonal Grid for the Sphere
Robert Sadourny, Akio Arakawa, and Yale Mintz 351–356
Comparative Properties of Some Time Differencing Schemes for Linear and Nonlinear Oscillations ... John A. Young 357–364
Role of a Tropical "Maritime Continent" in the Atmospheric Circulation ... C. S. Ramage 365–370
Selected Publications by ESSA Authors ... 370
Temperature and Height Variability in the Middle and Upper Stratosphere During 1964–1966 as Determined From Constant Pressure Charts ... Keith W. Johnson and Melvyn E. Gelman 371–382
A Nonlinear Model for Estimating Probabilities of $k$ Events ... Richard H. Jones 383–384
A Note on "Kelvin" Waves in the Atmosphere ... James R. Holton and Richard S. Lindzen 385–386
An Improved Method for Calculating Tropospheric Temperature and Moisture From Satellite Radiometer Measurements
William L. Smith 387–396
Picture of the Month ... Frances C. Parmenter 397–398
The Weather and Circulation of March 1968—A Warm Month With Increasing Westerlies ... Robert R. Dickson 399–404
Correction Notice ... 404

**NUMBER 7** **JULY 1968**

On the Exact and Approximate Linear Theory of Vertically Propagating Planetary Rossby Waves Forced at a Spherical Lower Boundary ... Robert E. Dickinson 405–415
A Numerical Procedure for Computation of Outgoing Terrestrial Flux Based Upon the Elsasser-Culbertson Model With Tests Applied to Model-Atmosphere Soundings ... F. L. Martin and J. B. Tupaz 416–427
Hurricane Hilda, 1964: I. Genesis, as Revealed by Satellite Photographs, Conventional and Aircraft Data
Harry F. Hawkins and Daryl T. Rubsam 428–452
Forecasting the Motion of Tropical Cyclones Using a Numerically Derived Steering Current and Its Bias ... Robert J. Renard 453–469
Correction Notice ... 469
Picture of the Month—Cellular Cumulus Over the Pacific Ocean ... Vincent J. Oliver 470–471
The Weather and Circulation of April 1968—Cool in the West and Warm in the East ... James F. Andrews 472–476

**NUMBER 8** **AUGUST 1968**

Experiments With a Stratospheric General Circulation Model:
I. Radiative and Dynamic Aspects ... Syukuro Manabe and Barrie G. Hunt 477–502
II. Large-Scale Diffusion of Tracers in the Stratosphere ... Barrie G. Hunt and Syukuro Manabe 503–539
A Revised Technique for Forecasting Hurricane Movement by Statistical Methods
Banner I. Miller, Elbert C. Hill, and Peter P. Chase 540–548
Synoptic Analyses of the Upper Stratospheric Circulation During the Late Winter Storm Period of 1966 ... Ben H. Williams 549–558
Profiles of Infrared Irradiance and Cooling Through a Jet Stream ... Donald R. Johnson and William C. Shen 559–572
Correspondence
Comments on "Numerical Advection Experiments" ... J. E. Fromm 573
Reply ... W. P. Crowley 573
Picture of the Month ... Frances C. Parmenter 574–575
Selected Publications by ESSA Authors ... 576
The Weather and Circulation of May 1968—Cool Weather With Widespread Blocking ... L. P. Stark 577–583

**NUMBER 9** **SEPTEMBER 1968**

Climatology of Monthly Precipitation Patterns in the Western United States, 1931–1966 ... William D. Sellers 585–595
The Spectrum of Daily Temperatures as a Climatic Indicator ... Van M. Polowchak and H. A. Panofsky 596–600
Lunar and Solar Barometric Tides in Australia ... B. Haurwitz and Ann D. Cowley 601–605
Vertical Motion Field in the Middle Thermosphere From Satellite Drag Densities ... R. E. Dickinson and J. E. Geisler 606–616
Hurricane Hilda, 1964: II. Structure and Budgets of the Hurricane on October 1, 1964 ... Harry F. Hawkins and Daryl T. Rubsam 617–636
Some Unusual Aspects Concerning the Development and Structure of Typhoon Billie—July 1967 ... Robert W. Fett 637–648
A Comparison of the Accuracy of Objective Techniques for Forecasting Typhoon Movement During 1967 ... E. Lee Geraldson 649–653
Correspondence
Note on Finite Difference Expressions for the Hydrostatic Relation and Pressure Gradient Force ... Yoshio Kurihara 654–656
Comments on "A Comparison of the Climate of the Eastern United States During the 1830's With the Current Normals"
Ivan W. Brunk 656–657

**NUMBER 9 (Continued)** **SEPTEMBER 1968**

The Effect of Polar Stereographic Projection on the Calculation of the Curvature of Horizontal Curves—K. Krishna 658–659
Picture of the Month—Frances C. Parmenter 660–661
The Weather and Circulation of June 1968—Unusual Tropical Activity—Raymond A. Green 662–667
Suggestions for Authors 668

**NUMBER 10** **OCTOBER 1968**

Global View of the Origin of Tropical Disturbances and Storms—William M. Gray 669–700
Hurricane Hilda, 1964: III. Degradation of the Hurricane—Harry F. Hawkins and Daryl T. Rubsam 701–707
An Eight-Year Experiment in Improving Forecasts of Hurricane Motion—Gordon E. Dunn, R. Cecil Gentry, and Billy M. Lewis 708–713
One-Year Experiment in Numerical Prediction of Monthly Mean Temperature in the Atmosphere-Ocean-Continent System—Julian Adem and Warren J. Jacob 714–719
Atmospheric Water Vapor Transport and the Water Balance of North America: II. Large-Scale Water Balance Investigations—Eugene M. Rasmusson 720–734
Comparison Among Various Numerical Models Designed for Computing Infrared Cooling—Hugh M. Stone and Syukuro Manabe 735–741
Picture of the Month—A Catalina Eddy—Jay Rosenthal 742–743
Weather Note
Hailstones, Starfish, and Daggers—Spiked Hail Falls in Oak Ridge, Tennessee—Gary A. Briggs 744–745
The Weather and Circulation of July 1968—Rather Changeable but Predominantly Cool—A. James Wagner 746–752

**NUMBER 11** **NOVEMBER 1968**

An Investigation of Thermal Tidal Oscillations in the Earth's Atmosphere Using a General Circulation Model—B. G. Hunt and S. Manabe 753–766
Variation With Longitude of the Quasi-Biennial Oscillation—A. D. Belmont and D. G. Dartt 767–777
Notice to Authors 777
Additional Evidence for Quasi-Biennial Variations in Tropospheric Parameters—J. K. Angell and J. Korshover 778–784
World Distribution of Mean Monthly and Annual Precipitable Water—Stanton E. Tuller 785–797
Correction Notice 797
Markov Chains of Order Greater Than One—William P. Lowry and Donald Guthrie 798–801
Some Practical Aspects of Overrelaxation in Diagnostic and Forecast Calculations—James H. S. Bradley 802–806
A Note on Lightning Strikes to Aircraft—William E. Cobb and F. James Holitza 807–808
Aircraft Reports of Cirriform Clouds on Certain High Latitude Routes and California to Honolulu—Maurice E. Graves 809–812
Central Montana Rainstorms and Floods—June 6–15, 1967—R. A. Dightman 813–823
Picture of the Month—Convective Cloud Systems—Frances C. Parmenter 824–825
The Weather and Circulation of August 1968—Sharp Contrasts in Temperature and an Unusually Strong Summer Index Cycle—James F. Andrews 826–832

**NUMBER 12** **DECEMBER 1968**

Climatology of the Low Level Jet—William D. Bonner 833–850
Circulation Patterns Associated With Heavy Snowfall Over the Western United States—Russell J. Younkin 851–853
A Parameterization of the Large-Scale Transient Eddy Flux of Relative Angular Momentum—Barry Saltzman and Anandu D. Vernekar 854–857
Linear Analysis of a Tropical Cyclone Model With Increased Vertical Resolution—Stanley L. Rosenthal and Walter J. Koss 858–866
Winter Cyclogenesis With Tropical Characteristics Over the Gulf Stream—Cadesman Pope, Jr. 867–875
Linear Programming Applied to Operational Decision Making in Weather Risk Situations—Robert E. Helbush 876–882
Approximate Convolution of the Gamma and Mixed Gamma Distributions—H. C. S. Thom 883–886
Note on the Combining of Two Probabilities by Means of a Scatter Diagram—Donald L. Jorgensen 887–888
Picture of the Month—Illustrating the Merger of Tropical and Extratropical Systems—A. James Wagner 889–892
Weather and Circulation of September 1968—Cool Over Much of the Nation with Progression of the Long Waves—Julian W. Posey 893–898
Contents, Volume 96 899–901
Correction Notices 901
Index, Volume 96 902–908

# CORRECTION NOTICES

Vol. 95, No. 7, July 1967, p. 404, under "Data and Procedures," the 2d line of equations should read:

$$\bar{q}\bar{v}=\frac{\Sigma qv}{N},\ \overline{q'u'}=\bar{q}\bar{u}-\bar{q}\bar{u},\ \overline{q'v'}=\bar{q}\bar{v}-\bar{q}\bar{v};$$ also p. 424, 3d line of "Summary," dates should read "May 1, 1961–April 30, 1963."

Vol. 95, No. 9, Sept. 1967, pp. 615–626: data in tables 3–6 repeat the data in table 2; corrected tables 3–6 are in Vol. 96, No. 1, Jan. 1968, pp. 63—72b.

Vol. 96, No. 1, Jan. 1968, front cover, "Contents . . . pp. 39–46": Latter part of title of paper by Maunder should read "—A New Zealand Example."

Vol. 96, No. 1, Jan. 1968, front cover, "Contents," and in text, pp. 73–74: change these page numbers to 72a and 72b; also p. 11, figure 19 is printed upside down.

Vol. 96, No. 3, Mar. 1968, p. 142, 1st line after equation (12): $S_\Delta^2(R)$ should read $\sigma_\Delta^2(R)$; also p. 143, figure 3 caption should include—"Curve 1: $|\Delta\epsilon|\leq 45$ m. Curve 2: $|\Delta\epsilon|>45$ m. Curve 3: value assigned to first-guess field"; also p. 145, equation (29), a left parenthesis should precede $\epsilon^*_{l,m-1}$.
